- Frameworks: **ReactJS**, **React**, **Flutter**
- Databases: **MySQL**, **Firebase**
- Language: **English**

Projects

Smart Printing Student Services

Tools: HTML - CSS, Javascript, ReactJS, MySQL

Responsibilities:

- Assisted students in printing by guiding them to pre-purchase print credits via the web system.
- Supported printing access from any printer across campus through a centralized online platform.
- Monitored print activity per user and device to ensure accurate usage tracking.
- Helped generate monthly revenue reports and printing statistics for administrative review.

Smart Irrigation Control System

Tools: Flutter, Kotlin Spring, Python

Responsibilities:

- Monitored and managed temperature, humidity, and irrigation volume daily and monthly.
- Collected and analyzed historical watering data, including active and inactive irrigation timestamps.
- Enabled automated watering based on configurable thresholds and user-defined conditions.
- Integrated AI-based moisture prediction to optimize irrigation timing and water usage.
